

**FOR IMMEDIATE RELEASE**

## **Alpha II to Provide Claim Scrubbing and Medical Necessity Services to UAE-Based Manteq**

*Relationship Furthers Alpha II's Efforts to Validate Claims  
and Improve Clinical Accuracy for Healthcare Providers Internationally*

**TALLAHASSEE, Fla. – August 21, 2018 – [Alpha II, LLC](#)**, a leading developer of software-as-a-service (SaaS) solutions that support healthcare reimbursement, today announced its relationship with [Manteq Systems & Information Technology, LLC](#) in Dubai, United Arab Emirates. Through the terms of the agreement, Alpha II will integrate ClaimStaker™ web-based, claim scrubbing and medical necessity solution with Manteq's Clemittance RCM offering. The move will enable Manteq's hospital and health system clients to validate claims for medical necessity and clinical accuracy against thousands of procedure and diagnosis coding combinations.

"We're proud to integrate ClaimStaker's comprehensive solution with Clemittance RCM, providing enhanced medical necessity precision to Manteq's extensive customer base," said Timothy Mills, Chief Growth Officer, Alpha II. "For more than 35 years, Alpha II has been on the forefront of healthcare rules and regulations, and the Manteq partnership will be invaluable as we extend the reach of our services and medical expertise internationally."

Alpha II provides medical necessity edits based on the CMS national coverage determination (NCD) policies as well as every Medicare Administrative Contractors' local coverage determination (LCD) policies. Alpha II has also developed proprietary data for procedure codes, defining the diagnoses that are considered clinically defensible in support of the specific procedures. This combination of the NCD, LCD and proprietary determinations make Alpha II's continually updated medical necessity content the most complete in the industry.

Wajih Ismail, Managing Partner of Manteq added, "At Manteq, we've always been committed to providing the highest quality software and services to our healthcare customers, while demonstrating a level of value that they cannot find anywhere else. Alpha II's ClaimStaker solution allows us to provide that value through exceptional claim accuracy, comprehensive medical necessity edits, and increased clinical efficiency throughout the revenue cycle."

Manteq's [Clemittance RCM](#) is an end-to-end solution for healthcare facilities and service providers to streamline and manage their revenue cycle. Clemittance plays a substantial role in this cycle by offering different integrated components that cover all segments of the revenue cycle workflow such as medical coding, claiming, submission management, payment reconciliation and remittance processing, data validation and medical necessity checks. These segments can be visualized using a smart BI engine designed primarily for the healthcare industry needs.

### **About Alpha II**

Through its software-as-a-service (SaaS) solutions, Alpha II supports coding, compliance, claims editing, value-based quality reporting and revenue analysis for healthcare professionals, clearinghouses and government entities – both directly and through software developers. The company’s toolsets, data content and rules engines currently plug and play with electronic health record, practice management and hospital information systems to help their customers comply with the latest policies, standards and directives.
