

FOR IMMEDIATE RELEASE

eSolutions Taps Alpha II's ClaimStaker for Enhanced Claim Scrubbing Capabilities

Cloud-based clinical claim and encounter scrubbing tool integrated to improve claim validity and accuracy, reduce denials and improve reimbursement for eSolutions customers

ORLANDO, Fla. – HIMSS 2017 Annual Conference and Exhibition (Booth #6761) – February 20, 2017 – [Alpha II, LLC](#), a leading developer of software platforms, software as a service and publications that support the healthcare revenue cycle, announced today it has completed implementation of its ClaimStaker product with eSolutions' ClaimRemedi suite of revenue cycle management products. Through the integration, eSolutions customers will receive seamless access to the robust content database and capabilities of Alpha II's ClaimStaker product.

"With the goal of always maximizing the value we offer to providers, we are continually striving to provide the most advanced capabilities in our product suite. At the end of the day, we want to equip our customers to take on any challenge that comes their way," said Gene Creach, president and CEO of eSolutions. "The expertise of Alpha II and the capabilities of its technology were a natural fit for our product portfolio. We believe this partnership will be a win-win for us and our customers."

Alpha II's claims editing solution, ClaimStaker, is a comprehensive clinical claim and encounter scrubbing tool designed for both professional and institutional claims to improve accuracy across thousands of coding and billing requirements. ClaimStaker does this by verifying claims and encounters from a payer's perspective, which also allows for corrections prior to filing. ClaimStaker's content database – more than 30 years in the making – is constantly being updated and improved to provide the most in-depth rules engine on the market today.

"It's clear how critical reimbursement is to providers in the healthcare landscape of today, as well as that of tomorrow," said Jan Powell, president and CEO of Alpha II. "ClaimStaker identifies errors prior to claim submission to deliver clean claims the first time. Clean claims and ensuring timely reimbursement is no longer an added bonus – it's vital to running a financially stable healthcare organization these days. We're thrilled eSolutions shares this understanding and has chosen to integrate our ClaimStaker product for its customers."

About Alpha II

Alpha II's software platforms, software as a service products and publications support coding,

compliance, claims editing and revenue analysis for healthcare professionals, clearinghouses and government entities – both directly and through software developers. Beginning with the initial receipt of patient data through the final scrutiny of the payer’s remittance advice, Alpha II empowers precision across the reimbursement process. The company’s toolsets, data content and rules engines currently plug and play with electronic health record, practice management and hospital information systems to help their customers comply with the latest policies, standards and directives.

For more than 30 years, the Alpha II experienced healthcare professionals have worked together to gather, analyze, and interpret healthcare coding and billing rules and regulations. Additional information can be found by visiting www.alphaii.com, [Twitter](#), [LinkedIn](#) and [YouTube](#).
