

ALPHA II

ClaimStaker

Precise Claims. The First Time.

Not all *claim scrubbers* are created equal!

Simply the most comprehensive clinical claim and encounter scrubbing solution available on the market today.

ClaimStaker™ is Alpha II's web-based "claim scrubber" delivered as a Software-as-a-Service (SaaS) solution model. However, ClaimStaker is much more than a traditional claim scrubber. It enables a proactive solution approach that eliminates most denials before they occur. It's time for your practice to retain your hard-earned reimbursement instead of spending your cash flow to chase your revenue.

The ClaimStaker solution includes all data content and rules needed to adjudicate and price claims under multiple Medicare Part A and Part B fee schedules. It also provides all coding and billing edits for multiple types of professional and institutional claims. This delivers improved claim accuracy on the first pass, decreased denials and improved cash flow, as well as increased efficiency and value for your practice and patients.

ClaimStaker's Edit Excellence

Countless and consistently-updated edits come included with ClaimStaker so your solution is far more detailed and expansive than the typical claim editing products on the market today. Edit messages go a step beyond to deliver not only the type of error, but also provide supporting information on why the error occurred. ClaimStaker can even be deployed directly into PM, EMR, and RCM workflows.

With sub-second response times, claim accuracy is verified using the industry's most comprehensive clinical scrubbing database. This clinical content is reviewed and validated by our team of experienced experts based on the multiple coding, billing, and compliance regulations. The result is a comprehensive solution with edits not found in any other claim scrubber.

The Flexibility You Need

Our goal is to provide you with the tools needed to produce clean claims. This includes staying on top of the constantly changing billing and coding rules and regulations, as well as maintaining up-to-date data content. With Alpha II, you gain a complete team of clinicians, certified coders, software engineers, EDI specialists, medical managers, and many more subject matter experts who are committed to this unending change management.

ClaimStaker's expansive features, functions, and configurability truly differentiate it from the competition. Getting started is easy with preset edit configurations based on your specialty type. Then take it a step further and enable or disable the edits you want with the simple click of a check box.

And, if the need arises, ClaimStaker even includes an easy-to-use "edit wizard" that allows you to create custom edits based on a set of parameters that will trigger your tailor-made messages.

Precision. Accuracy.

With Alpha II's **ClaimStaker**, it's our proven track record and the testimonies from our varied mix of partner customers, clinicians, administrators, and their respective staffs that validates the fact that "not all claim scrubbers are created equal."

We encourage you to Rethink Everything about your traditional approach to claim scrubbing and REimagine what your practice could be like with Alpha II:

- **RE**duced days in AR
- **RE**lieved administrative burden
- **RE**covered **RE**venue

Make sure claims are as accurate as possible before they are submitted to payers.

Improve staff productivity and enable more focus on patient care.

Reduce back-end denials by submitting clean claims up front.

Incorporate our comprehensive content database and rules engine.

"We simply don't have the time or the people to capture all the millions of possible clinical edits or keep up with the constant rule changes. Alpha II software products have been doing this for decades and its database serves as a powerful engine behind our claim scrubber solution."

Practice Insight

Peace of Mind in Data Security

All Alpha II SaaS solutions are hosted in two separate data centers using active/active technology. This allows us to provide optimal load balancing, minimal downtime, and thorough disaster recovery, resulting in Tier 4 (99.995%) uptime status operational sustainability.

Alpha II and its facilities have been accredited by the Electronic Healthcare Network Accreditation Commission (EHNAC), a federally-recognized standards development organization and accrediting body designed to improve transactional quality, operational efficiency, and data security in healthcare.

Allow Alpha II the opportunity to earn your partnership so you can REimagine REimbursement.
