

Alpha II MIPS Accelerator 2024 Standards Advancement Process (SVAP)

Overview

Alpha II's ONC Certified MIPS Accelerator Product utilizes the most up to date interoperability standards. As part of our certification, we will be utilizing the Standards Version Advancement Process (SVAP) to voluntarily update our product to the most up to date ONC approved SVAP Versions of our certified functionality.

More information on the SVAP process can be found [here](#).

2024 SVAP Updates

The MIPS Accelerator certified criteria 170.315(c)(3) Clinical Quality Measures (CQMs)-Report will utilize the approved standards:

- CMS Implementation Guide for Quality Reporting Document Architecture Category I Hospital Quality Reporting; Implementation Guide for 2024 (Updated August 2023)
- CMS Implementation Guide for Quality Reporting Document Architecture Category III Eligible Clinicians Programs; Implementation Guide for 2024 (Updated November 2023)

Alpha II Client Impact

Updates are automatically applied to our web-based platform. When utilizing the certified functionality 170.315(c)(3) Clinical Quality Measures (CQMs)-Report within our product the exported files will meet the updated standards.
